Photo of Architectural Roof Shingle

[Click to enable Adobe Flash Player](#)

Roof shingles that match the GAF-Elk Timberline Series colors Weathered Wood, Pewter Grey, and Charcoal are "pre-approved". There is no need to wait for a response from the ARC before proceeding if you select a color that matches one of those above, however you must still submit an ARC Application for Modification form. For all other colors you must wait to receive written approval before proceeding.
